Address:

433 North Street, Square, Chardon

Price:

80.00 \$

Your child learn the basics and begin creating their own works of art through cake! They will learn how to decorate a cake from beginning to end for \$16 a class and decorate their own cake in the last class.

Week 1 we will be covering piping bag assembly, basic piping, borders and writing , and making and adjusting decorator's buttercream

Week 2 we will be working on different flowers types including roses, class the will continue flowers, do a borders and writing review , large swirl flower technique and possibly more but we will probably run it if time there

Week 3 will review all learned skills then we will start learning to make flowers, including roses.

Week 4 is usually the last session. Children's classes may run an extra week if they need more of my time. I like to work with them until they have successfully mastered the concept.

Once the concept is mastered the rest is about practice. If you extra class week 4 is about honing skills then they need further attention.
